

## LET'S WORK TOGETHER.

**WHO:** Cloverleaf is a Cincinnati based startup that launched in January 2017. The founders worked together in a previous company where they had an awesome team experience. But most employees in the US do not enjoy their teams and hence, their jobs. Thus, Cloverleaf was started to build stronger teams inside organizations. We're on a mission for every team to be a thriving team with people doing work that energizes them.

**WHAT:** Cloverleaf is seeking a summer Design Intern. This role would work closely with our COO, Marketing Manager and Director of Brand. Responsibilities to include:

- Working within our branding guidelines to incorporate our voice and tone into all customer deliverables and marketing/sales collateral (digital and print)
- Designing reusable report templates for survey results and team insights (stuff we deliver to all customers)
- Flexibility to create projects that will represent our brand to customers
- Creation of marketing and sales collateral, assets, and templates (digital and print)
- Basic web design & support (Squarespace with some CSS, and HTML)

**WHY:** Because we are committed to not only delivering the highest value to our customers, but delivering it beautifully.

**WHEN:** Summer 2018, start and end dates are flexible. 15-20 hours per week.

**WHERE:** At our office in downtown Cincinnati, potential for some remote work.

**HOW MUCH:** \$10/hr

**INTERESTED?** Email Devon at [devon@cloverleaf.me](mailto:devon@cloverleaf.me) with a resume and a link to a portfolio or design samples

## BUILD BETTER TEAMS.
